Working student software development CAD (m/f/d)

Your Job

- As an active member of our development team, you will work on our customer projects to develop add-ons for the CAD system PTC Creo. This includes not only programming, but also designing, testing and documenting the software solutions.
- You will take responsibility for exciting tasks in large projects and drive them forward. Occasionally, you will also take on a small project and implement it independently.
- You will document the results and organize the transfer of knowledge to the team.

Your Benefits

- Flexible working hours of up to 20 hours per week with the option of a mobile office – so that your job fits in well with your studies!
- Option to write your thesis and permanent position after graduation – plan your future with Software Factory!
- Strong and open team – the colorful WE is important to us!
- Actively collaborating and supportive CEOs – good cooperation is a top priority!
- Many opportunities to help shape the company – make Software Factory your company!
- Freedom for personal and professional development – we'll see where we're going together!
- Modern, spacious office with a great roof terrace and beach chair – feel at home with us!
- Regular events – the boss barbecues for the team!
- Lots of attractive benefits – free drinks, meal discounts, free parking and much more

Your Know-how

- Preferably you are enrolled in a STEM degree program and have a good technical understanding.
- You already have basic knowledge of programming with C++ and would like to deepen this.
- You are reliable, enjoy working in a team and can communicate technical issues well.
- You enjoy working independently and learning new things.
- You have a very good command of German and English.
