

ATLAS x2x

OWN YOUR IOT PLATFORM

Development of individual and quickly available IoT solutions

ATLAS x2x is the fastest available, license-free IoT platform for tailor-made solutions within various industries.

Increase your competitive position through quick implementation and availability

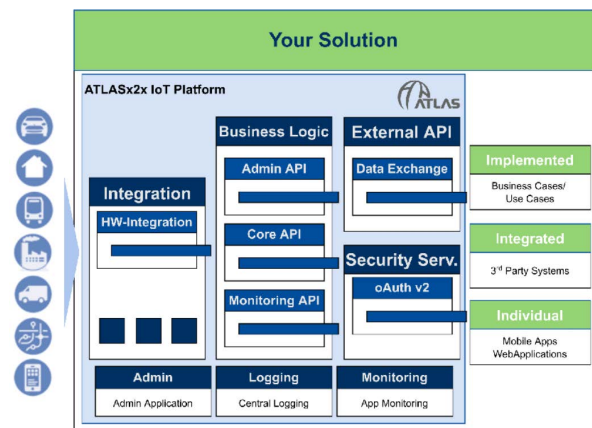

Currently, IoT platforms are either subjected to significant in-house development costs or cost-intensive license models. However, the versatile, expandable and flexible IoT platform, ATLAS x2x, is a one-time purchase without any further dependencies on the provider. Most of the existing IoT platforms on the market are oversized for SMEs. It is here ATLAS x2x illustrates its versatile nature as you are able to determine the scope of the services and functionalities of your own IoT platform, tailored especially to your requirements. In order to carry this out successfully, we will support you each step of the way.

IoT Platform ATLAS x2x

The independent platform from Atlastech will form the foundation of your digital transformation. What is special about ATLAS x2x is that it does not rely on long-term ties to the platform provider through complicated license models; it allows you to become a platform owner from the purchase. Take advantage of the following platform benefits:

- Full property rights & own IP
- Immediately usable
- Significantly shortened development times
- Tailored to your requirements
- Complete independence
- From on premise to multi-cloud
- Ready-to-use toolbox
- Unlimited adaptations / extensions

TCO (total cost of ownership) in your own sphere of influence
ATLAS x2x also allows you to become a platform provider. As a result, you have the possibility to offer your IoT solutions as a subscription, which can be done on premise or in the cloud.

Atlas x2x IoT-Platform

Software Factory digital solution

As a software manufacturer with 25+ years of experience, we are able to successfully implement SaaS solutions on the ATLAS x2x platform according to your use cases and requirements. After doing so however, you will be independent of the service provider as we hand over the solution (including the source code). You become the sole owner after the purchase. We will be available as an „extended workbench“ for the operation and maintenance of your digital solution. Software Factory -offers the following options:

- Setup of the ATLAS x2x platform in the cloud or onsite
- Implementation of customer-specific uses cases as SaaS
- Maintenance and further development
- Operation and maintenance of the ATLAS x2x platform in the cloud and on premise
- Technology and operation training

Summary

- Fast implementation as a result of the standardized product
- Complete autonomy from the provider
- Expansion of the business model through a subscription offer for your clients
