

Dear Sir or Madame,

the start of a new year most often offers one the opportunity to tackle new or postponed topics. It is a time when challenging goals can be mastered with a new energy. At Software Factory, we are pleased to be able to support you in expanding existing solutions and optimizing them for you. Every day, we face new challenges that serve both your and our further development.

Individuality, flexibility and diversity are always in our focus to define and realize your digitization goals.

Everybody talks about digitization, but does the topic seem intangible to you? We can show you how you too can use existing processes and machines to make your company **more efficient with the help of digitization!** To kickstart your company's digitization process, your individual requirements can be sent to us directly. We are looking forward to taking on such challenging projects with you! In this newsletter you will find an array of information on products, as well as webinar and training dates that will further assist you with becoming acquainted with the topic of digitization!

Sincerely

Your Team at Software Factory

SF Products and Solutions

Faster and more Efficient with Creo Extensions and Automations

PTC Creo is a mature product, which is solid, robust and extendable. However, **specific extensions** and **automations** offer even more potential to make your development and design with Creo even more efficient. **Increase your productivity** by assisting your experts' working processes. Contact us and start to make your processes faster and more efficient!

Extensions for Checking and Automated Repair of Standards and Guidelines with SF ModelCHECK Extensions

Extend the OOTB ModelCHECK module in PTC Creo Parametric with the **SF ModelCHECK Extensions** add-on.

By doing so, you are able to **uphold** and **improve** your company-specific **model and design standards**. Get additional functionality for your CAD software to ensure compliance in the design process. Increase the quality of CAD data and ensure the continuity of downstream process chains. More information on the product is available on our website!

Working without Excel and Word with Windchill RV&S for Requirements Management and Validation

Do you still work document-based for requirements management and validation? Release the brakes and leave Excel and Word behind today by using Windchill RV&S. Using Windchill RV&S for requirements management has the added benefit of **increased control** and **efficiency** in comparison to Word and Excel. Learn more on how we can implement this for you either on our website or contact us directly!

New Year - New Webinar Dates!

SF Free Innovation
Webinars

In January we will start with the continuation of our SF Free Innovation Webinars on **WEB.Link Programming for PTC Creo**. In Part IV to VI you will learn more about Windchill Connectivity, working with UDFs and the interaction between API's & Model Import/Export.

Take the chance to deepen and expand your knowledge on the topic.

Start the year with innovation and digitization - **register directly for free!**

P.S.: Do you want to start learning about our products from the beginning? We will continue to offer our webinars on **Creo Toolkits, Windchill & ThingWorx Navigate Development** as well as all webinars on **Creo WEB.Link** in 2022. Stay tuned!

Get on Board with Digitization with us!

Take advantage of our hands-on workshops on **Windchill RV&S** as part of our **IIoT trainings**.

These can be based on the PTC Standard Reference Solution or individually on the basis of your data model.

Our flexible one to five-day workshops are **individually** adapted to your requirements and level of knowledge. From beginner to expert.

Practical examples already serve as a basis for your own further development. You can also rely on our support for implementation and configuration even after the training!

Secure a slot directly with us!

P.S.: In 2022 we will also be offering events on the topic of **PTC Creo Parametric: Creo Toolkit, J-Link and Web.Link**.

A Celebration is in Order!

For more than **20 years** now, **Christine** and **Antonius** have been supporting us on a daily basis and have brought our projects and, moreover, us as a company forward. For this we say thank you! We are grateful for your great cooperation and loyalty at all times. A very special thank you also goes to our colleague **Martin** (photo left). He started at Software Factory **25 years ago**; today he is supporting the CAD area in a key function. He is a valued expert not only among colleagues, but also among our clients. We look forward to many more years with all of you!
