

Dear Sir or Madame,

the current circumstances have brought about substantial changes to everyday life. Social distancing and other restrictions have been rather difficult to take on, prompting the cancellation of almost all trade fairs and events in the upcoming months. The chance to network and exchange ideas has been challenged, but despite the changes, new possibilities and opportunities have emerged. To support you during your time working from home, we are offering a variety of webinars and online seminars on a wide range of topics from the areas of CAD, PLM and systems engineering. One thing which has become clear from the current situation is how important digitization is for each of us and how it can also be utilized by companies to enhance productivity. Don't miss out on the chance to do so!

Sincerely

Your Team at Software Factory

## SF Products and Solutions

### Windchill Navigate Extensions - Single/Multilevel, Cost & Service BOMs and Technical Data Packages creation by Navigate Apps

With Navigate Apps for Windchill, users across the company are given easy, role-based access to the data they need for their tasks and work steps. As a result, significant increases in productivity and efficiency are achievable as Windchill specialists do not have to use their time to search for data or make it available. Navigate Apps were newly developed with functional extensions to provide the user with specific BOMs (single / multilevel, cost and service BOMs), as well as the interactive creation and possibility to download technical data packages quickly and easily.

## MaxxDB/Solidworks - Windchill Data Migration of 400.000 CAD objects in less than 4 Months from Commissioning to Go Live

Data migrations are always a challenge, let alone the migration of 3D CAD data into a PLM system. Yet, the migration experts from the Software Factory have just successfully completed another migration project - MaxxDB/Solidworks - Windchill - with our SF Migration Factory without downtime for the users. 400,000 Solidworks CAD objects, including the entire history, were migrated within a four-month period, spanning from commissioning to going live. According to our client's statement, the engineering designers have almost reached the productivity of the old system after two weeks with Solidworks in Windchill. Additionally, the quality of the migrated CAD and metadata has been rated as high. If you are also planning to migrate CAD data from third-party and legacy systems to Windchill; or mergers, acquisitions and divestitures are on your agenda: we are able to help out!

## Creo Automation with Toolkits - Blended/E-Learning for your WEB.Link, J-Link, Toolkit, OTK Training Classes

We are now offering all Toolkits trainings for Creo online. The structure of the training, which could be over one week with full days, two weeks with half days or spread over several weeks, is coordinated and defined with the participating trainees.

- WEB.Link (JavaScript) training for PTC Creo Parametric
- J-Link (OTK Java Free) training for PTC Creo Parametric
- OTK (Java) training for PTC Creo Parametric
- Creo Toolkit and Creo Object Toolkit OTK (C/C++) training for PTC Creo Parametric

# SF Free Innovation Webinars and Online Seminars

## WEB.Link and Toolkit for PTC Creo

In recent times, it has become even more apparent how important digitalization is to companies. Make use your time at the moment to expand your expertise in this field by attending one of our recently launched services, SF Free Innovation webinars and seminars. We are here to support you and get you out of this crisis stronger. Register now for our current webinars on WEB.Link and Toolkit. We look forward to seeing you there!

## Efficient service and sales in Mechanical Engineering with Augmented Reality

Experience AR practically and discover opportunities on offer for your company in relation to service and sales. As part of our SF Free Innovation series, we will present a free, one-hour online seminar on May 27th at 3 p.m. (CEST) with our partner PTC, how augmented reality (AR) can sustainably strengthen your company. Find out more and register now!

## Vuforia Chalk for Free

With the COVID-19 pandemic, we are all facing significant and unprecedented challenges. Long-distance cooperation in particular can mean a drastic change in familiar work processes, not only for industrial companies. Yet Vuforia Chalk offers unimagined possibilities! As a partner, we welcome and support the PTC contribution to test Vuforia Chalk for free until June 30th. Take advantage of this unique opportunity and familiarize yourself now with this cutting-edge innovation!

## We proudly present: ATLAStech!

ATLAStech's ATLAS x2x is a versatile, expandable and flexible IoT platform that makes you independent of licensors. Additionally, companies can adapt the scope of services and functionalities of the IoT platform according to their own requirements. We are excited about ATLAS x2x and look forward to carrying out innovation with our SF Digital Solution Partner.

**P.S.:** Take the chance and get to know the IoT platform ATLAS x2x on May 19th at 3 p.m. (CEST) during a 45-minute online seminar on "Digital Products With a Clear Competitive Advantage - One App Alone is Not Enough"!

## Trade Fairs and Events

Due to the current circumstances, all major events and trade fairs have been cancelled until the end of August. However, you still have the chance to take part in some virtual events, including:

### LiveWorx20, Virtual for 2020

Since the LiveWorx cannot take place in Boston this year due to the pandemic, PTC will offer LiveWorx 2020 virtually on June 9th. Even despite the crisis, you have the opportunity to experience the innovations of digital transformation live. Learn more about the latest trends in CAD / PLM, IIoT, AR / VR and digital engineering from the comfort of your own home. Our CEO, Dr. Andreas Gallasch, will report on the multi-award-winning Smart Factory of our client, Lorenz, in his lecture on "Production Control System for an Assembly Line of IoT-Enabled Water Meters". Be there and take advantage of this unique opportunity!

# Software Factory - Innovative through Research!

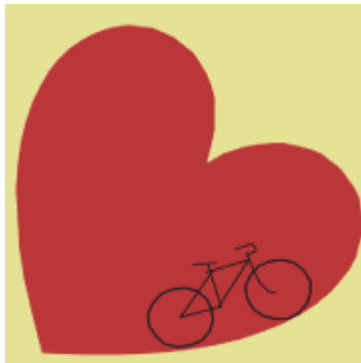

## Quality Seal from the Association for the Promotion of Science and Humanities in Germany

As part of the research and development survey in Germany in 2019, Software Factory was awarded the "Innovative through Research" quality seal from the Association for the Promotion of Science and Humanities in Germany for its extensive research work. We are pleased to be recognized in this progressive field and will continue to shape Germany's future. Find out more about our numerous research projects on our website.

## Round two for Cycle with Heart!

Join us on Sunday, July 5th, 2020 and cycle for a good cause. By participating, you will support the fundraising campaign "Cycle with Heart" from the Rotary Club Munich. With every kilometer cycled, donations will be made for children's polio vaccinations. This year we are working on an updated version of the mobile app, which allows you to record all kilometers travelled, despite the current contact restrictions. Come cycle with us!
