

Dear Sir or Madame,

Change always presents us with new challenges – whether that be in our daily lives or professionally. But change is precisely what develops us as individuals and brings us forward. But change does not always have to be person-specific; it can also be company bound. This rings especially true for digitalization and how it instigates the agile adaptation, development and growth of company processes. The continuous optimization and adaptation of processes to new trends needs to be carried out in order for companies to keep up. In this context, it is an advantage to have a competent and experienced partner at your side to support you on your company's digital transformation path. In addition to Software Factory's extensive product and solution portfolio, it and its development teams also offer consulting, support and reliable services even after the implementation of the respective solution. Together, we are eager to tackle change with you! Let's start right here in our newsletter with our latest innovations.

Sincerely

Your Team at Software Factory

SF Products and Solutions

Manual Product Configuration in Engineering was Yesterday - CPQ for PTC Creo and Windchill with Elfsquad

Industry 4.0 and Digital Transformation require new, automated and agile methods to improve process flows between clients, sales, engineering and production. With our new **Creo-Windchill integration** of the **CPQ (Configure-Price-Quote) system Elfsquad**, engineering and sales teams as well as your customers themselves can easily and automatically configure client products online. Learn more about this on our website!

NEW: SF Inspect 2D for PTC Creo Update

Version 6.0.0 is now available! Benefit from new features such as geometric tolerance analysis with a full migration to the **GTOL analysis functionality**, brought to you by Creo-4.

As part of the extended analysis of geometric tolerances, you now have the option of mapping value and reference data of geometric tolerances in textual/symbolic form in **two new columns of the characteristics list**.

APR.	GTol-Value	GTol-Value-Extended
208		
209		
210		
300	Ø0.75@50	+ Ø0.75@50 A B C
301

SF Agile for PTC Windchill RV&S

SF Agile for PTC Windchill RV&S (formally known as Integrity Lifecycle Manager) is THE Kanban front-end integrated with Windchill RV&S. With the new Kanban, the user-friendly and customizable tool enables **interactive sprint planning via drag & drop functionality** and **planning of any item type** (tasks, reviews, change requests, user-defined). In addition, you always get instant feedback on the total value of story points in the sprint. With SF Agile, you can also benefit from an **"always in sync" functionality** to Windchill RV&S. Learn more about SF Agile for PTC Windchill RV&S on our website or contact us directly!

Manufacturing Execution System (MES) – YES! But...

...what are the benefits of implementing an MES in the first place? Which MES is the right one for my company? What do I have to invest in for it? What could a first step look like? Our SF experts will be happy to discuss all of these and many more questions that may be on your mind at the moment. Thanks to many years of experience, Software Factory can refer to successful customer MES solutions that not only incorporate operating and machine data, but also **explicitly take process data into account** and enable **tracking and tracing on the individual part level**. This is a decisive advantage that can provide our clients a clear competitive edge.

Trade Fairs and Events

As with 2020, 2021 also offers virtual possibilities to establish personal contact with clients, interested stakeholders as well as students.

For this reason, we will once again be part of the virtual IKOM, the largest student career fair in Germany.

IKOM 2021

Where?

Virtual

When?

June 28th - 30th, 2021

What?

On June 29, we will highlight career opportunities at Software Factory for students at our virtual booth. In addition to exciting **working student positions**, we also offer numerous opportunities for **starting a career**. We are already looking forward to numerous exciting conversations with interested students!

SF is a 2021 MINT Minded Company!

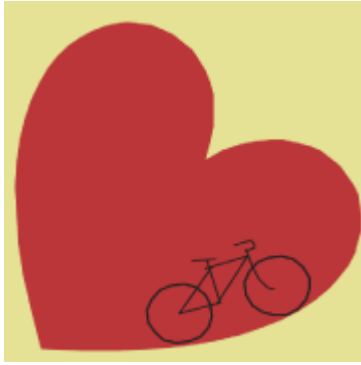

We are pleased to have received the "**MINT Minded Company**" award again this year. With this award, audimax MEDIEN GmbH honors companies that promote MINT young talents, MINT talents and MINT professionals in a special way.

We are proud to be one of these companies and will continue to strive to be a strong advocate for creative minds and innovative MINT young professionals by offering student traineeships, apprenticeships and internships!

We Cycle for a Good Cause!

Also this year, it is close to our heart to support the charity event "Cycle with Heart" of the Rotary Club of Munich on **04.07.2021!** The motto "Cycle with us - help people!" is completely manifested in the event itself as with every kilometer cycled, **polio vaccinations for children** are financed by donations from sponsors and participants. You too can support "Cycle with Heart". Simply register and you are ready to go!
P.S.: You can also use the alternative dates to cycle your individual tour! Every km counts!
