

Dear Sir or Madame,

have you gotten used to the "New Work" yet?! Over the past couple of years, **change** has been at the forefront of our lives and taken on new meanings. Once mostly neutral, change now is often associated with strain and restriction. How can we help commandeer this? Change requires **flexibility** across multiple avenues – including in corporate processes, teamwork and daily life.

Not only does the "New Work" require constant tweaking in order to find the most fitting solution for employees and companies, but also our products and solutions for your digital transformation. We are constantly striving towards making your **processes even more efficient!** We are moving away from strict, pre-prescribed development processes to those imbedded with "**changeability**"; the constant ability to change! Read our latest newsletter to find out which current topics are driving the Software Factory team forward!

Sincerely

Your Team at Software Factory

SF Products and Solutions

Trade Fairs and Events

We are pleased that some face-to-face events are possible again this year. Among others, we are thrilled to be able to connect with those in the industry at the following events:

INNEO Fachkonferenz Digitalisierung 2022 - Review

On May 11th, 2022, the Fachkonferenz Digitalisierung took place live again at the ICS Messe Stuttgart. The Software Factory team also took the opportunity and participated with an exhibition booth. **Our highlight:** Dr. David-Becker Koch from the Zentrum für Sonnenenergie- und Wasserstoff-Forschung Baden-Württemberg (ZSW) who spoke about "Smart battery cell production as an innovation driver for Germany as a business location" during his presentation!

PTC User 2022

Where?

Orlando, Florida

When?

October 3rd - 6th, 2022

What?

This year, the PTC User 2022 will once again take place **live in Orlando**. True to the motto "**Back together again**", PTC users will meet on site to talk and network about the latest innovations around the PTC products **CAD, PLM, Retail, Manufacturing, AR, IoT, etc.** The Software Factory experts will of course be there and look forward to an exciting exchange! Learn more!

Our Trainings in the 2nd half of 2022

Take the chance and participate in our **virtual training sessions!**

We have already published our new dates for 2022 on the topics of **PTC Creo Parametric (Creo Toolkit and J-Link)** and **Industrial Internet of Things (IIoT)**.

As part of our extensive training offering, we also provide training on the topics of Windchill, Windchill RV&S, MBSE, Vuforia and Web.Link for PTC Creo. We create your individual training, adapted to your requirements, in terms of time and content.

Our service for you: Even after the training, you can count on our support on implementation and configuration!

Done! Research Project: Regulus!

The research project **REGULUS**, funded by the BMWi, has successfully been completed! In cooperation with the Institute for Machine Tools and Industrial Management of the Technical University of Munich (iwb), the Chair for General Material Properties and the other project partners Heggemann AG, AMAG components Deutschland GmbH, Fronius Deutschland GmbH and Boeing Deutschland GmbH, an SF team researched the **resource-efficient production of large-volume aerospace structural components**. For this purpose, our team developed a CAD/CAM, data management and visualization software for production planning and networking of production systems and workpiece for traceability. Well done!
