SF AGILE
APPLICATION LIFECYCLE MANAGEMENT

Windchill RV&S

SF AGILE - Agile work with PTC Windchill RV&S

SF AGILE for Windchill RV&S supports agile methods, like SCRUM and Kanban based on Windchill RV&S. It leverages functionality of existing agile solutions wrapped in a modern, web-based user interface.

Agile methods of software development and requirements management

Agile methods are commonly used in software development and requirements management. SF AGILE Solution now lets you leverage PTC Windchill RV&S for state-of-the-art agile based methodologies.

Capabilities

- Adoption to individual processes
- Complete management of end-to-end development, lifecycle and process chain in Windchill RV&S, together with interface to integration systems
- Traceability of the entire development process by using a combination of different methodologies (Agile/Non-Agile) within the same Windchill RV&S instance
- Feasible link to non-agile artifacts within Windchill RV&S (requirement documents, models, source code, etc.)
- Visualization of metrics and reports

Benefits

- One platform covering the entire development process
- Web-based user interface
- Leverage of existing PTC Windchill RV&S architecture

SF Agile's web-based user interface offers various management functionalities

Simple User Interface

- Intuitive web-based user interface
- Kanban board for managing sprints
- Coverage of the complete agile process

Product Backlog → Sprint Backlog → Daily → Sprint → potentially shipable product increment

Agile Scrum Process

Summary

- **SF** AGILE add-on enhances PTC Windchill RV&S
- Web-based user interface for agile development projects
- No functional restrictions of PTC Windchill RV&S
- SF AGILE can be purchased modularly or as a complete package
